- Worked in **CompuRx InfoTech Pvt. Ltd.**, Delhi as a Web Designer From January 2007 to May 2010.

Key Responsibilities

As Assistant Manager - UI development knows how the system should adapt. Responsive layouts use HTML, JS, CSS3 media queries on the Web that are quite exciting things.

A User Interface Developer (UID) for short is not someone who knows a bit of HTML. As UI developers for the Web, we must know about HTTP (and siblings), HTML, CSS, JavaScript, JQuery, Ajax, JSON, multiple browsers (and their individual differences), tools, and programs that deal with Web communications. As developers, you must know about the human cognition and logic sorting.

- Handle team, Task assign, Check task
- Create Web application front end as per design comps and information architecture
- Integrate front-end application with the application business layer
- Follow best practices and standards for accessibility and cross-browser compatibility
- Create conceptual diagrams, visual mock-ups, and manage detailed user interface specifications.
- Guide and maintain developer teams and best practices
- Coordinate with Interface Design Architects for meeting accessibility standards at code level
- Working closely with PERL, PHP, Java and .Net Developers to produce User-friendly dynamic web applications

Project Description

www.teche.life

Technology: Angular
